

VORMENFABRIEK TILBURG

Vormenfabriek Tilburg: short introduction

BV Vormenfabriek Tilburg, established in 1921 specializes in the development, production and worldwide sales of polycarbonate injection moulds, thermoformed moulds and silicone rubber moulds for the chocolate and confectionery industries.

BV Vormenfabriek Tilburg offers a complete range of moulds for large automatic and small semi-automatic moulding lines.

We are driven to transform your ideas and designs into the highest quality, custom made moulds.

For Vormenfabriek continuous improvement is a way of life, with the customer in focus. You will find our moulds in all corners of the world, used by reputable chocolate producer labels and available via our network of sales partners.
