

## Form follows function

bv vormenfabriek tilburg located in Tilburg / The Netherlands is specialized in the development, production and worldwide sales of polycarbonate injection moulds, thermoformed spinning moulds and silicone rubber moulds to the chocolate and confectionery industries.

bv vormenfabriek tilburg manufactures a wide range of moulds for use on every large automatic moulding line to small semi automatic or hand operation. With our specific computer controlled injection presses we produce moulds suitable for any moulding plant.

This means that in virtually all cases we meet your specific wishes, transform your ideas and designs into high quality moulds and we guarantee their absolute exclusivity.

We have been producing chocolate moulds for almost 95 years and have therefore commanded all necessary technical and creative know how. We are supported in our worldwide sales by a successful agent network .
